

We're asking you to help create a new secure health account website for people in Leicester, Leicestershire and Rutland.

Your feedback could win you a £50 iTunes voucher!

We are currently redeveloping Leicestershire Partnership NHS Trust's online services, introducing new features and functions. This will include a new online secure health account website. The health account website will help you manage your health and wellbeing, via your smartphone, tablet or PC in the same way that online banking gives you secure access to manage your finances online.

We want to ensure that this new service will meet your expectations and therefore we need to know what you think is important. For example, you could see current and historical information about the health of you and your children, make and review healthcare notes, receive and organise personalised guidance and speak directly with health care staff.

Please tell us what you think by completing this survey:

<http://www.smartsurvey.co.uk/s/Leicestershire-NHS-Health-Account-all/>.

Giving your opinion should take around 10-15 minutes. All completed surveys will be entered into a draw to win a £50 iTunes voucher!
